## Custom Made Boilers for the Recycling Industry

BGI can now introduce our latest solution to the challenges faced by companies who deal with waste wood.

The **Biokompakt 135kW** with electro magnetic filter is designed specifically to keep the emissions down when processing recycled wood and other non-woody biomass materials.

The solid refractory ceramic chamber being put into place.

These biomass boilers are registered to burn recycled wood and are currently being implemented within the UK Recycling Industry.

**To learn how we can solve your Waste Wood problem or to find out more about these unique boilers,**

**call us on 01494 757055  
or email us on**

*“Our work within the Waste Wood sector is revolutionising the way in which waste products are now viewed and utilized as a source of cost effective, green energy.”*

**- Matthew Hunt,  
Managing Director, BGI Ltd.**

### In This Issue

- Custom Made Boilers for the Recycling Industry
- BGI's Pallet Chipper
- BGI Approved Installer wins Industry Awards
- Join our network and become a BGI Accredited Installer

## More Industry Awards for our Accredited Installers

This month, congratulations go out to **Wessex Biomass** for being a finalist in the RHI Installer of the Year category at the recent Energy Efficiency Awards.

This adds to their Autumn win at the National Heating & Renewables Awards where they were a finalist in the category of High Efficiency Boiler Installer of the Year 2015.

Well done to Peregrine and his team!

## Become a BGI Accredited Installer

BGI are the UK's exclusive distributor of the Kostrzewa range of Biomass Boilers—truly affordable boilers utilizing low cost, sustainable fuels. These boilers are Class 5 Rated and the 48 boilers in the range start at 10Kw and range up to 285kW.

BGI Accredited Installers are fully trained in assessing, installing and maintaining these latest innovative biomass boilers.

By Joining the BGI Partner Programme, all installers undertake a full day of training held at the BGI HQ in Bucks. The day comprises both classroom style learning and practical installation training in our Showroom.

As well as in-depth learning about the Kostrzewa range, you will also learn about boilers and fuels that can operate outside of the RHI. **BGI are planning for life after RHI with all its rules and regulations on fuel types. Here, we will share with you our research on locally sourced, alternative biomass fuels.**

To secure your place on one of our forthcoming courses or to find out more, please call us on **01494 757055**.

**As a fully accredited BGI Partner, you will benefit from:**

- ◆ £100 back when placing your first boiler order
- ◆ Access to BGI's extensive infrastructure and network
- ◆ BGI guaranteed and certified products
- ◆ Full training on all products and full marketing support

# Waste Wood & Pallet Chipper

from £29,495

**With the introduction of the SPE1300, you can now transform your waste wood pallets into a valuable fuel.** Our new manually fed pallet chipper has been constructed specifically for shredding pallet and wood waste into high quality wood chips.

With an hourly throughput of up to 30 pallets, wood chips of a size ranging from G30 to G50 can be produced.

The chipper has a reversible counter knife and 36 rotating cutting blades, which are intended for two time utilization.

The drive of the cutting unit is performed by a belt drive via an electric motor. The system is simple to operate and easy to maintain.

## Technical Data:

Length: 1940mm

Width: 1200 mm

Height: 1920mm
